

AGRICULTURAL CLIMATE SOLUTIONS ON FARM CLIMATE ACTION FUND

2022-2024

APPLICATION GUIDELINES

February 2023

OFCAF Program Application

Step 1 - Applicant Contact Information (Communication and disbursements will be addressed to applicant name)

	Applicant (Farm Name or Applicant Contact Infor Individual Name)	mation is prepo	pulated with info	rmation from your	registratio	on.			
	Contact Name								
	Email	0	FCAF Client Number:						
	City/Town								
	Province NB Postal Code	NB Postal Code County: COUNTY not CANADA							
	Registered Agricultural Producer Number:								
	p 2 – Project Cost and Work Plan Use atribution requested.	the area belov	w to summarize	project costs a	nd				
Gr	oss Farm Income: ☐ less than \$10,000 ☐ \$10,00	00-\$49,999 🗆 \$50	,000-\$99,999 🗆 \$100	,000-\$249,999 🗆 grea	ater than \$250	0,000			
	D 1 4%	Estimated Cost of	"Other Source" Contributions	\$ Requested from	Proposed '	Work Plan			
	Budget Items	BMP Element	(name, amount	OFCAF	Start Date	End Date			
A.	Nitrogen Management								
a)	develop a multi-year N based nutrient management or annual N fertility plan								
b)	georeferenced soil sampling with VRA mapping								
c)	regular nitrogen fertilizer and inhibitor price difference								
d)	certified or common seed and planting cost to increase legumes in rotation								
e)	offsetting higher cost of synthetic fertilizer substitutes (manure, compost, digestates)								
f)	fertilizer application equipment upgrades to allow banding, side dressing and injection								
g)	cost of split nitrogen application								
h)	transitioning to better manure management, cost associated with manure handling equipment to enable shallow incorporation								
i)	polymer coated nitrogen fertilizer price difference								
	NITROGEN BMP TOTAL								
В. (Cover Cropping								
a)	develop a cover cropping rotation plan								
b)	purchasing certified or common seed of recommended cover crop species								
c)	Cost of planting								
d)	Equipment to manage cover crop								
	COVER CROPPING BMP TOTAL								

C. Rotational Grazing

a)	develop grazing management plan & engineering plans			
D)	grazing infrastructure (fencing & equipment, installation, piping & renewable energy water systems)			
c)	purchasing certified or common seed of recommended legume and grass pasture mixtures and cost of seeding for improved pasture composition			
	ROTATIONAL GRAZING BMP TOTAL			
	Total OFCAI			

Step 5 - Additional Information

All applications must include a georeferenced aerial photo map with farm and field identification or georeferenced field location polygons. ArcGIS shape (shp) files are available from service providers (consultants, lime and fertilizer spreaders, JD Operations Center. KML files can be digitized and exported from Google Earth Pro. Refer to program guidelines for specific additional required documentation or contact the NBSCIA OFCAF Administration (ofcaf.facf@nbscia.ca) or your local NBSCIA coordinator for assistance. Hard copy OFCAF applications are available from the NBSCIA OCAFA Program Administrator.

NOTE: All applications must include the appropriate OFCAF Program BMP Appendix document(s) listed below to support your request for a contribution.

- A. Nitrogen Management
- B. Cover Cropping Management
- C. Rotational Grazing Management

TERMS AND CONDITIONS

- 1. The Applicant acknowledges that the decision of NBSCIA as to entitlement to an amount of funding by contribution, if any, is final and binding and without right of appeal or review by the Applicant.
- 2. The Applicant acknowledges and understands that the Applicant must disclose in this application for project funding, all proposed sources of funding, including sources and amounts from federal, provincial or municipal governments, conservation groups, and private organizations, including in-kind contributions, for the duration of this project.
- 3. The Applicant acknowledges and understands that failure to comply with all the program requirements may delay processing the application or render the Applicant ineligible for financial assistance under the program.
- 4. The Applicant will allow the NBSCIA to visit and/or photograph the project site for monitoring or promotional purposes. The NBSCIA will obtain permission from the Applicant prior to any such activities and these activities will not interfere with property operations.

Declaration and Signature

The applicant certifies that the information and representations contained in this application are true and correct to the best of his/her/ its knowledge and belief.

The applicant hereby gives his/her/its consent to the NBSCIA employees, agents, successors and assigns of NBSCIA to seek and obtain further and other information to whatever extent and from whatever sources or records as may be deemed or considered appropriate.

The applicant consents to the disclosure of applicant contact and project information to Canada for disclosure of financial, investment and qualitative information related to the funding of a project. Financial information disclosed may be funding under a priority area, activity area and recipient type. Contribution information may be disclosed for the purpose of analyzing impacts of Government of Canada investments in the sector. Qualitative information may be disclosed to evaluate the results achieved from spending on programs under OFCAF.

The applicant consents to Canada publishing the amount of funding the applicant has received under the Agricultural Climate Solutions – On-Farm Climate Action Fund.

.Applicant Signature	DATE						
Administration Only							
Date Received:							

Completed applications can be submitted as follows:

✓emailed to: ofcaf.facf@nbscia.ca

√mailed to NBSCIA OCAFA Program Administrator,150 Woodside Lane Unit 2, Fredericton NB; E3C 2R9

OFCAF Application Appendix A: Nitrogen Management

Applicant Information

Applicant (Farm Name or Individual Name):	Applicant contact information is propopulated with information from your registration							
Contact Name:								
Email:		OFCAF Client Number:						
Phone Number:	•	Cell Number:						
Address:								
City/Town:								
Province:	NB Postal Code:	County COUNTY not CANADA						
Number of Livestock by Type: None Dairy Beef Sheep Other (Please specify)								
Step 1 SITE PLAN								

Provide a georeferenced aerial photograph showing the field identification and location. Georeferenced farm and field locations emailed to ofcaf.facf@nbscia.ca ArcGIS shp file or Google Earth Pro kmz polygon format are preferred. ArcGIS shape (shp) files are available from service providers (NBSCIA, consultants, custom lime and fertilizer spreaders, JD Operations Center, etc). KMZ files can be digitized and exported from Google Earth Pro. https://www.youtube.com/watch?v=-2sRYiwqzDs

Insert or Attach as Separate Page if Necessary

Field names or IDs must match with those in sections a,b,c,d,e,f,q,h,and i below

Step 2 – Nitrogen Management Project Plan and Cost Worksheet

It is recommended that you discuss plan with a BMP Program Advisor prior to applying.

Current practices: Describe your current nitrogen management practices used. (e.g., rotation, nitrogen sources and management practices, legume and manure credits)

In addition to the general description of the current practice include specific application rates in lb or kg per unit of land area in relation to crop requirement.

Improved nitrogen management practices: Please describe the new practices that will be adopted, and how they are intended to improve nitrogen use efficiency and reduce nitrogen loss in terms of the following applicable nutrient management themes.

Source (e.g., controlled release, legumes, manure management):

Brand of polymer coated nitrogen.

Identify specific product brands and nitrogen contents.

For manure provide an estimate of saving and emission reduction with incorporation.

Inhibitors must include both urease and nitrification products- Dicyandiamide + N-(n-butyl) thiophosphoric triamide (NBPT)

Provide estimates of Synthetic Nitrogen Fertilizer Substitutes (manure, compost, digestates) spreading costs.

Rate (e.g., reduced rate, variable rate, enhanced calibration):

Identify how the rate is established (soil, tissue, other). Quantify the reduced rate compared to the current practice using data from the OMAFRA NMAN2 software.

Quantity applied should match with purchases with the claim.

Refer to the Nitrogen Management Calculator included as a requirement for Appendix A application.

Timing (e.g., split application, foliar application):

Define split or other applications relative to the crop growth stage.

Include specific application rates in lb or kg per unit of land area in each slit application

Include general dates of time of application relative to crop growth stage.

Calculate cost difference in lb or kg per acre x number of			e x number of a	cres to arrive	a Total Estima	ted Cost.		

FUNDING REQUEST

Please complete the table below with as much detail as possible. Attach any applicable quotes, engineering plans, etc. BMPs applied to a specific farm area prior to the Program are ineligible. Note, however, that an expansion of a BMP application on a farm area where these BMPs have not been previously employed is eligible. In the case of transitioning to better manure management, only activities that improve manure incorporation in the soil are eligible.

diversity amore appropriate of the control of the c	Project Expenses Inning (e.g., nutrient management plan, including crop Persification plans to increase legumes and pulses in Ition; engineering or technical design work by a qualified Ressional); Soil testing and soil and VRA mapping; Use of Ressional trease inhibitors; Use of soil organic Rendments and synthetic fertilizer substitutes (manure, Repost, digestants); Increasing legumes in rotations to Rount for N credit from legumes in subsequent crop; Split Relication of fertilizer with reduced rate as a result of Reased crop use efficiency; (changing to application during Rodevelopment to better match plant needs and reduce Rogen loss); Transitioning to better manure management Rimproved manure incorporation to avoid volatilization. Step 1 SITE PLAN

Provide a georeferenced aerial photograph showing the field identification and location. Georeferenced farm and field locations emailed to ofcaf.facf@nbscia.ca in ArcGIS shp file or Google Earth Pro kmz polygon format are preferred. ArcGIS shape (shp) files are available from service providers (NBSCIA, consultants, lime and fertilizer spreaders, JD Operations Center, etc). KMZ files can be digitized and exported from Google Earth Pro. https://www.youtube.com/watch?v=-2sRYiwqzDs

Insert or Attach as Separate Page if Necessary

Field names or IDs must match with those in sections a, b, and c, below

L	
	an to provide the information requested. Additional information can be attached separately and submitted is recommended that you discuss the plan with a BMP Program Advisor prior to applying.
Current Standard Practice	Explain your current cover cropping practices (if any) and how this project will improve and/or expand your current standard practice.
Rationale for Cover Crop Species	Please describe why you have chosen the cover crop species or mix. What outcomes are you targeting? (e.g., fall erosion control, winter erosion control, nitrogen loss reduction, carbon sequestration) For assistance in choosing cover crop species, an online decision-making tool can be found at http://decision-tool.incovercrops.ca/
Rationale should include	e timing and planting dates for species in multi-species mixes.
Rotational Fit	Explain how this cover crop fits into the rotation and supports the cash crop you intend to plant before or following the cover crop (e.g., less tillage, more residue)
Explanation should inclu	de seeding dates and compatibility with other seasonal farm operations.
Machinery Implement/Method of Establishment	Outline the equipment you will use to establish the cover crop and the number of additional operations required (e.g., a tillage and a seeder pass). Provide an estimate of the timeframe or cropping window within which you expect to establish the cover crops. Ensure it fits within the suggested establishment windows for the species selected and detail a fallback species or mix
Requests for new equipr	ment should clearly define the cost benefit in machine operation costs and timeliness of managing

cover crops

FUNDING REQUEST

Please complete the summary table below with as much detail as possible. Attach any applicable supplier quotes, engineering plans, etc. BMPs applied to a specific farm area prior to the Program are ineligible. Note, however, that an expansion of a BMP application on a farm area where these BMPs have not been previously employed is eligible. Note that crops that will be harvested or grazed leaving less than 6 inches (15cm) of cover crop growth over winter and crops that can be harvested in the next growing season intended for market (e.g., winter cereals) are not eligible under this program.
